

CAPTOR

ASTER GLOBAL CREDIT SHORT TERM

MONTHLY REPORT - JANUARY 2023

PORTFOLIO MANAGER COMMENT

The year began with falling interest rates, where the rise in interest rates from the second half of December 2022 reversed. Swedish inflation rose during January to the new record high of 12.3% at an annual rate, while the underlying inflation adjusted for interest and energy prices landed at 8.4%. The Riksbank has a difficult balancing act ahead of it, where interest rate increases may lead to a more severe recession than necessary, while a more dovish policy may weaken the Swedish krona and give more prolonged inflationary pressure than, for example, the euro area gets. The interest rate sensitivity of the Swedish economy with high leverage with a short fixed interest period for both households and companies makes it even more difficult to navigate.

Short term interest rates have slowly climbed upwards during the month to price in upcoming rate hikes in February. Credit spreads have tightened during the month, European index by 12 basis points from 92 to 80 basis points and US by 9 basis points from 82 to 73 basis points. In the European index, consumer staples in particular have performed strongly, while communication has widened somewhat. In the US index, the energy sector has tightened the most and consumer durables have widened the most.

This month, and going forward, we have chosen to present the fund's performance in this report without an index comparison. Our internal risk benchmark and publicly available indices are unfortunately not appropriate to use for performance evaluation purposes. As a consequence the graphs that normally show relative performance will be empty.

INVESTMENT GOAL AND STRATEGY

The fund targets highly liquid exposure in European and North American Investment Grade credit, whilst keeping both currency and interest rate risk in Swedish Krona. To this end credit exposure is assumed via index-based centrally cleared Credit Default Swaps (CDS). The Reference Indices of the CDS contracts are Itraxx Europe Main and CDX Investment Grade North America. The exposure to each issuer is equally weighted, ensuring a well-diversified portfolio.

The fund takes positions that eliminate its exposure to companies that do not meet the sustainability requirements set up by Captor. The fund is classified as Article 8 according to the Disclosure Regulation.

The fund's capital will be invested in AAA rated SEK bonds, primarily Swedish covered bonds. Interest rate exposure is assumed via these bonds and cleared interest rate swaps in Swedish Krona.

REASONS TO INVEST

The fund is suitable for investors with home currency in Swedish Krona looking for attractive risk-adjusted returns through a well-diversified exposure to global investment grade credit. The strategy is suitable for investors looking for liquidity in all market conditions.

By construction the strategy effectively avoids being directly exposed to EUR or USD long term interest rates. In addition, the fund avoids all costs typically associated with hedging foreign currency back into Swedish Krona.

HOW TO INVEST IN THE FUND

Some of the fund's share classes are available through Swedish banks and fund platforms. Furthermore, some share classes have a higher minimum investment, and for such share classes a dilution levy can be applied at subscription/redemption in order to protect the fund's shareholders. The process is the same as employed by exchange traded funds and also allows for physical creations/redemptions.

RISK PROFILE

Credit risk is the dominant risk factor in the fund. It is exposed to credit spreads of both its bond positions and its position in CDS contracts.

Portfolio managers

Daniel Karlgren, Ph.D

Daniel has fifteen years of experience in trading fixed income, equity and currency products. He has previously worked as a quantitative analyst and asset manager at Handelsbanken and built up and managed a derivative portfolio at Industrivärden.
