

CAPTOR

ASTER GLOBAL CREDIT SHORT TERM

MONTHLY REPORT - NOVEMBER 2022

PORTFOLIO MANAGER COMMENT

A somewhat negative start to the month turned over one afternoon into a strongly positive trend. For the first time since February, US inflation data was presented that was lower than market expectations. This led to a sharply rising stock market and significantly lower credit spreads. During the month, as expected, the Riksbank raised the key interest rate by 0.75 percentage points to 2.5%. While long-term interest rates have fallen, the shortest interest rates have remained stable, resulting in a strongly inverted Swedish swap rate yield curve. The interest rate market is pricing in a high risk of recession as early as next year when the key interest rate, after having passed a peak of approx. 3.25%, is expected to fall again in the fourth quarter of 2023.

The possibly decelerating inflation has given both the stock and credit markets new hope for a soft landing for the economy. The contrast between the sharply inverted yield curve and the rising stock market is in many ways reminiscent of the situation before previous recessions. The month's relief has meant a compression from 113 to 91 basis points in the European credit index and from 89 to 81 basis points for the American index. The compression has been broad across all sectors in both indices.

INVESTMENT GOAL AND STRATEGY

The fund targets highly liquid exposure in European and North American Investment Grade credit, whilst keeping both currency and interest rate risk in Swedish Krona. To this end credit exposure is assumed via index-based centrally cleared Credit Default Swaps (CDS). The Reference Indices of the CDS contracts are Itraxx Europe Main and CDX Investment Grade North America. The exposure to each issuer is equally weighted, ensuring a well-diversified portfolio.

The fund takes positions that eliminate its exposure to companies that do not meet the sustainability requirements set up by Captor. The fund is classified as Article 8 according to the Disclosure Regulation.

The fund's capital will be invested in AAA rated SEK bonds, primarily Swedish covered bonds. Interest rate exposure is assumed via these bonds and cleared interest rate swaps in Swedish Krona.

REASONS TO INVEST

The fund is suitable for investors with home currency in Swedish Krona looking for attractive risk-adjusted returns through a well diversified exposure to global investment grade credit. The strategy is suitable for investors looking for liquidity in all market conditions.

By construction the strategy effectively avoids being directly exposed to EUR or USD long term interest rates. In addition the fund avoids all costs typically associated with hedging foreign currency back into Swedish Krona.

HOW TO INVEST IN THE FUND

Some of the fund's share classes are available through Swedish banks and fund platforms. Furthermore, some share classes have a higher minimum investment, and for such share classes a dilution levy can be applied at subscription/redemption in order to protect the fund's shareholders. The process is the same as employed by exchange traded funds and also allows for physical creations/redemptions.

RISK PROFILE

Credit risk is the dominant risk factor in the fund. It is exposed to credit spreads of both its bond positions and its position in CDS contracts.

Portfolio managers

Dr. Daniel Karlgren

Daniel has fifteen years of experience in trading fixed income, equity and currency products. He has previously worked as a quantitative analyst and asset manager at Handelsbanken and built up and managed a derivative portfolio at Industrivärden.
