

CAPTOR

Aster Global Credit Short Term

Monthly Report - April 2023

Portfolio Manager Comment

Looking back at the month of April in terms of its start and end point gives a deceptively inaccurate picture of a volatile interest rate month. The market's view of future interest rates has changed significantly during the month. The aftermath of part one of the US and Alecta regional banking crisis marked the beginning of the month with falling interest rates. After this soft start to the month, the specter of inflation returned and discussions about whether it is reasonable for central banks to further raise and then sharply lower interest rates within the next year returned. That key interest rates affect the economy with a certain lag, depending on how long the average interest rate fixation period in each economy is, is becoming increasingly clear. The risk of raising interest rates "too much, too fast" has shown itself in unexpected places even as the underlying labor market is proving stronger than expected. The Riksbank's expected interest rate increase of 50 basis points came on April 26, and the subsequent communicated "softer" interest rate path drove down the market's interest rate expectations during the last part of the month.

After the turbulence in March, April felt as a calm month for the credit index. European index tightened about 2 basis points to 83 basis points and American index tightened from 76 to 75 basis points. Utilities was the strongest sector in Europe, but the movement was only 7 basis points monthly. In the US, Communications performed the best with a tightening of about 5 basis points. Technology was the only sector that widened during the month, by about 2 basis points.

Investment Goal and Strategy

The fund targets highly liquid exposure in European and North American Investment Grade credit, whilst keeping both currency and interest rate risk in Swedish Krona. To this end credit exposure is assumed via index-based centrally cleared Credit Default Swaps (CDS). The Reference Indices of the CDS contracts are Itraxx Europe Main and CDX Investment Grade North America. The exposure to each issuer is equally weighted, ensuring a well-diversified portfolio.

The fund takes positions that eliminate its exposure to companies that do not meet the sustainability requirements set up by Captor. The fund is classified as Article 8 according to the Disclosure Regulation.

The fund's capital will be invested in AAA rated SEK bonds, primarily Swedish covered bonds. Interest rate exposure is assumed via these bonds and cleared interest rate swaps in Swedish Krona.

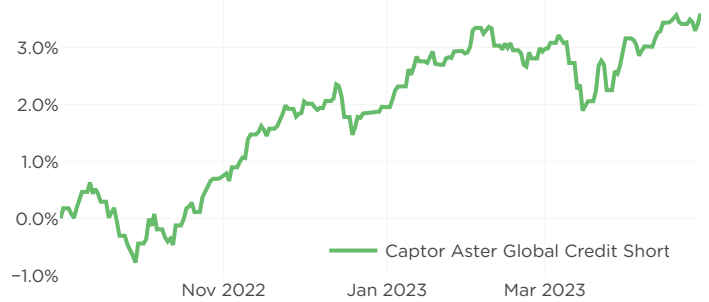

Risk Metrics

Duration	0.06 years	CDS index EUR spread	82.99 bp
Credit duration (CDS)	4.83 years	CDS index USD spread	74.92 bp

Credit Ratings

Reasons To Invest

The fund is suitable for investors with home currency in Swedish Krona looking for attractive risk-adjusted returns through a well-diversified exposure to global investment grade credit. The strategy is suitable for investors looking for liquidity in all market conditions.

By construction the strategy effectively avoids being directly exposed to EUR or USD long term interest rates. In addition, the fund avoids all costs typically associated with hedging foreign currency back into Swedish Krona.

How To Invest In The Fund

Some of the fund's share classes are available through Swedish banks and fund platforms. Furthermore, some share classes have a higher minimum investment, and for such share classes a dilution levy can be applied at subscription/redemption in order to protect the fund's shareholders. The process is the same as employed by exchange traded funds and also allows for physical creations/redemptions.

Risk Profile

Credit risk is the dominant risk factor in the fund. It is exposed to credit spreads of both its bond positions and its position in CDS contracts.

Portfolio managers

Daniel has fifteen years of experience in trading fixed income, equity and currency products. He has previously worked as a quantitative analyst and asset manager at Handelsbanken and built up and managed a derivative portfolio at Industrivärden.
